THE FASTER, MORE AFFORDABLE WAY TO HIGH QUALITY INDOOR SIGNAGE AND GRAPHICS PRINTING.

As the world's first original ink tank professional graphics printers, the SureColor™ B-Series offers fast and precise printing for indoor signage and graphics, and CAD drawings & architectural designs. Fitted with a high-capacity ink tank, the B-Series utilises Genuine Epson Dye Inks, optimised for the printers' Micro Piezo TFP print head, to deliver best quality prints at the lowest running cost.

Lowest Running Cost in its Class

Now experience high-quality printing at extremely low running costs – as low as ₹2 per sq ft*

Ink Tank for High Ink Yield

The easy-to-refill ink tank with a high capacity of 1.5 litre per colour is specially designed to help you achieve high quality and continuous high-volume printing for long.

Highest Productivity in its Class

The Micro Piezo TFP print head with 720 nozzles for each colour delivers precise, super-fast printing, almost 4x that of competition.

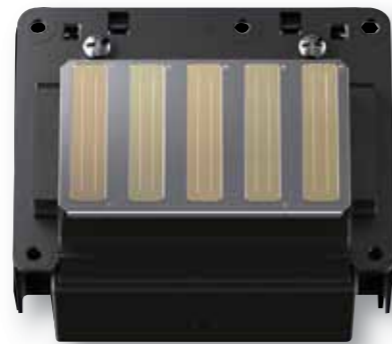

*Under test conditions.

Enjoy low total cost of ownership with the world's first large format printer series featuring an original high-capacity ink tank system to quickly produce high volumes of outstanding printouts up to 163cms (64") wide, for a wide variety of indoor commercial and technical drawing applications. Enabling print service providers across the world to take their business to the next level.

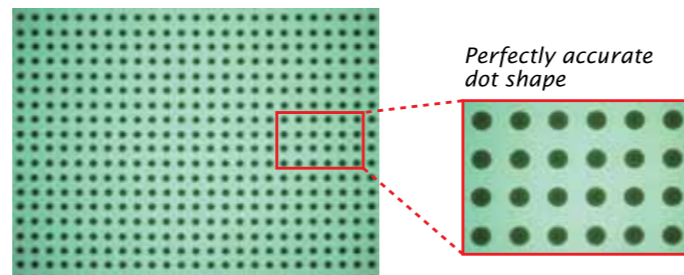

Lowest Running Cost in its Class

The Epson SureColor SC-B6070 and SC-B7070 deliver cost-efficiency like never before. With the reliable original ink tank system that reduces ink wastage, highly affordable genuine Epson dye-based inks, and Micro Piezo print head technology that optimises the usage of ink, these new large format printers deliver high-quality indoor signage and graphics & CAD prints at an extremely low running cost – as low as ₹2 per sq ft*!

Highest Productivity in its Class

Engineered with the robust Micro Piezo TFP print head that can print 720 dpi per single-pass against competitor's 360dpi, and now equipped with double the standard nozzle count from 360 to 720 per colour, the Epson SureColor B-Series delivers precise, super-fast printing, almost 4x that of competition. You can now achieve a maximum throughput of 28.6m²/h and 69.5m²/h from the B7070 & B6070 respectively.

Perfectly accurate dot shape

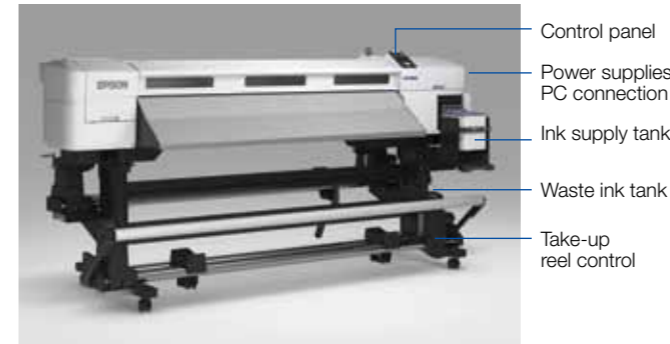

*Under test conditions.

User-Friendly Design

The SureColor B-Series has been designed for extreme ease of use.

Operator-friendly placement of functions

All major operations and settings can be accessed conveniently on the right side of the printer.

Easy-to-use interface

The new control panel features a 6.35cm (2.5 inch) colour LCD for easy and stress-free operation. It also features a large LED alert lamp and buzzer to notify on any ink, maintenance box or paper feed error.

Status notification system

Status alerts for instances such as 'End of Print Job', 'Error' or 'Ink Running Out' can be sent to users via email notification.

Easy Media Operation

Accurate paper feeding

The high-rigidity welded frame reduces shudder while printing. This combined with the Auto Tension Control feature ensures high precision in paper feeding. In addition, the user can correct the paper feed value without interrupting the printing process and minimise paper wastage.

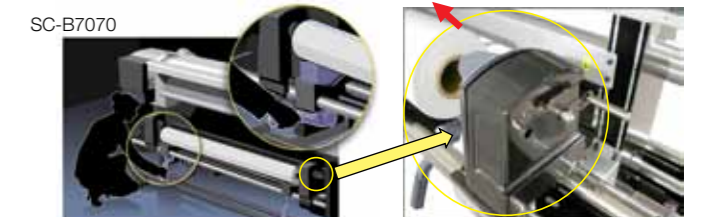

Custom media setting back-up function (B7070)

Custom media settings for common or special jobs can be stored on LFP Remote Panel 2 on a user's workstation and shared with other connected SC-B7070s.

Easy media loading and handling

Spindle-less roll media handling makes paper loading a breeze. And while the new flange in the SC-B6070 prevents the roll core from dropping out of the flange during the printing process, the Lift Lever in the SC-B7070 makes the setting up of heavy rolls effortless.

Lift lever

Rotate the handle to squeeze the setter

Place the paper roll above the groove on the top of the printer

Attach the flanges on the left and right

Slide it along the holder, and after placing it, pull out and set the paper, then fix the paper roll lock bar on the right side.

*SC-B6000 Series does not have Roll Cover.
